March 29, 1996

Dear Dan,

I would like to thank you for the excellent job you did for us coating the New Boston Unit 2 intake canal during the recent outage. The weather conditions at the time were difficult at best with the below freezing temperature and snow. Your people stuck with the job and even though it took longer than we had planned the final product looks terrific.

The station personnel inspected the canals once you completed and were impressed. Coating of the expansion joints should eliminate the problem we have had with grout breaking off and eventually damaging the condenser tube sheets.

I would be pleased to recommend you to other potential customers and plan on using your services in the future.

Sincerely,

William G. Bottiggi
Project Manager
